SOCIETY

THE BUSY SHOPPING SEASON HERE

The shops in town are thronged with shoppers who plan to shop early and avoid the last hurried and tiring weeks before Christmas—sad to say many often procrastinate—unwillingly 't is done but, nevertheless true, the result is an overtired head of the home, not equal to the many last demands. And then the girls who so patiently attend to our wants in the shops, they must always be cheerful, no matter how tired they may be, even sick and yet they must keep on ever smiling and helpful with a suggestion if needed, trying to hasten the package that is long delayed in the wrapping room. You forget a sample and hasten back to the counter, then a wild chase after a bit of silk or lace; it more than likely has caught in another purchaser's gown or package; then for a while your shopping is at low ebb. You simply cannot go on without the sample, such carelessness! Try once basting your samples in the lack of your shopping book and find out how very much easier it all is, not only for yourself but everyone in any connection with you gains by just a little system. If it is the pattern counter go over your books at home, select a first, second and third choice, give your numbers to the girl in the department and while waiting for your package watch the women who are wildly turning pages and asking for numbers that are out of stock, and so the story goes.

If one takes the trouble one is taught a splendid lesson by just either sitting or standing (as the management may or may not have the comfort of his customers at heart) and watch the buyers. It is at times like a social tea for here we all know each other and it simply means talking things over when we meet. Each year we always plan to do things differently but, alas! Human flesh is weak and we put off for tomorrow what could be so much better done today.
